HOISTS

MOBILE POWER PACK

The Platform Lift is a small, low profile platform hoist designed specifically for fast turnaround on wheel and tyre work. Extra long run-up ramps make this product suitable for low clearance vehicles.

A range of practical special features make the Platform Lift incredibly versatile while maximising working space. Operation is simple with instant 240volt power connection and mobile power pack which can be easily positioned anywhere around the hoist. The stable platform structure is ideally suited for tyre dealers, brake specialists and panel repairers.

4 RUBBER BLOCKS INCLUDED

For increased functionality, a range of practical accessories and customisation options are also available including various lifting and lowering aids.

All our products are made in Australia and built to the highest safety standards. Our commitment to excellence is backed by our three year warranty.

Australian designed and made, we offer a full range of readily available spare parts.

STURDY DESIGN

Hoists are manufactured in South Australia from high quality steel and powder coated for durability.

The electro/hydraulic operating system supports a long and trouble free lifespan. The electric motor plus gear pump with self-adjusting coupling form the powerful heart of the heavy duty hydraulic system. Built into the tank, the valve housing controls the flow of hydraulic fluid and protects the hoist in case of overload.

SIMPLE OPERATION

Basic controls are located on the mobile power pack – a single push button to lift and lever to lower.

Activated by the lock release pedal, five mechanical lock positions are available, ranging from 850mm to 345mm.

Comprehensive service manuals and installation guides are supplied with every hoist. Online demonstration videos for selected products and parts are also available.

SAFETY FEATURES

All Molnar hoists meet Australian standards (AS/NZ1418.9:1996).

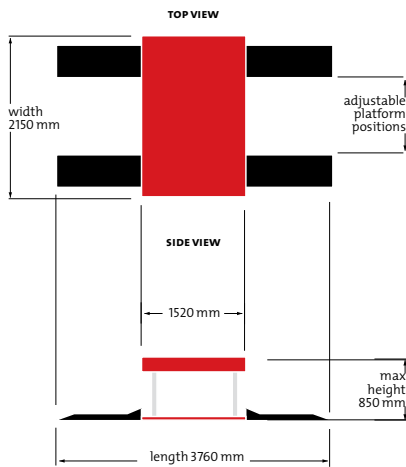

In built safety controls include:

- five mechanical lock positions
- protection in case of hydraulic failure
- overload protection

PL92

'PLATFORM'

- 3 tonne scissor lift with platform
- extra long removable run-up ramps with anti-theft locks; suitable for four-wheel drives and low clearance vehicles
- 240V power connection for easy installation options
