HOISTS

Compact yet sturdy, the Scissor Lift is an above ground hoist capable of full servicing for most vehicle types. Intended for use in commercial workshops, service stations or tyre workshops, the compact design provides 360-degree external access to the vehicle, allowing all doors to be fully opened. Especially suited for quick service turnaround, the narrow footprint is ideal for workshops with width restrictions or for general space saving economy.

SIMPLE TO USE
CONTROLLER

4 RUBBER
BLOCKS INCLUDED

For increased versatility and functionality, a complete range of practical accessories and customisation options are also available, including drive through model and 240 Volt electric motor.

All our products are made in Australia and built to the highest safety standards. Our commitment to excellence is backed by our three year warranty. Australian made, we offer a full range of readily available genuine spare parts.

STURDY DESIGN

Hoists are manufactured in South Australia from high quality steel and powder coated for durability.

The electro/hydraulic operating system supports a long and trouble free lifespan. The electric motor plus gear pump with self-adjusting coupling form the powerful heart of the heavy duty hydraulic system. Built into the tank, the valve housing controls the flow of hydraulic fluid and protects the hoist in case of overload.

SIMPLE OPERATION

The separate control unit is mounted adjacent to the lift, in any position to suit workshop layout. Simple operational push buttons are located on the hand held pendant control, attached by an extra long lead for maximum reach. Single push to lift and double push/ hold to lower.

Comprehensive service manuals and installation guides are supplied with every hoist. Online demonstration videos for selected products and parts are also available.

SAFETY FEATURES

All Molnar hoists meet Australian standards (AS/NZ1418.9:1996).

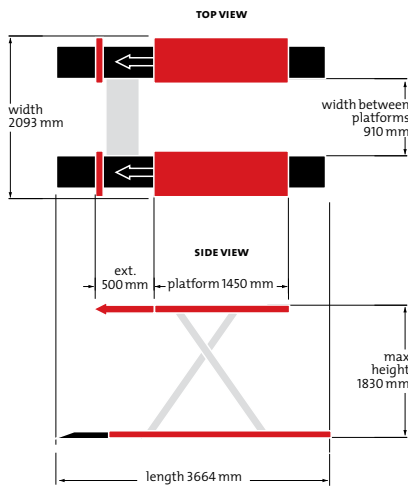

In built safety controls include:

- range of mechanical lock positions
- protection in case of hydraulic failure
- overload protection
- solid torsion beam controls platform movement

SL02

'SCISSOR'

- 3 tonne Scissor Lift
- ideal for wide range of general vehicle servicing requirements
- suited to small workshops with restricted space and height
- separate control unit can be located in various positions
- single drive-in direction only; optional 'drive through' available - **SL02-DT**
- two cable guard lengths included standard (1 metre lengths) – **SL02-HC**
- 4 Rubber Blocks included standard – **PL92-RB**

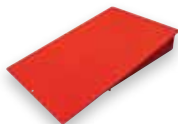

Footprint	2093 x 3664 mm
Lifting Capacity	3 tonnes
Width Between Platforms	910 mm
Max Raised Height	1830 mm
Min Lifting Time	55 seconds
Motor	3 phase
	<i>optional single phase available</i>

ACCESSORIES AND OPTIONS

240V Power
optional 240 Volt single phase motor

Scissor Run-Ups, Drive Thru
additional run-ups for drive through capability

Scissor Lift Beam
provides additional pick up options
