COATED**

MODEL MF 1705 - OH - 3T QL QUICK SERVICE LIFT CLEAR FLOOR OVERHEAD HOIST

SPECIFICATIONS:

- A Width Between Columns 2650mm
 - B Overall Width 3250mm
 - C Overall Height 3850mm
 - D Overall Length 1200mm
 - E Inner Height 3735mm
 - F Maximum Raised Height 1855mm
 - G Minimum Lowered Height 45mm
- Lifting time: 20 seconds (working height)
 Capacity: 3000kg (3.0 tonnes)
 Electric Motor: 3PH 3HP 2870RPM
 415 Volts 50 Hertz

Optional 240 Volts available

Total Weight: 722kg

The Manufacturer reserves the right to alter these features and specifications without notice.

Simple operation

The various controls are conveniently arranged and within easy reach. A push button for lifting, a lever for lowering. Both equipped with dead man control (if the button or lever is released, the movement automatically stops). This ideal push button-and-lever combination allows accurate height adjustment.

Pump unit

The gear pump with self-adjusting coupling and the electric motor form the powerful heart of the hydraulic system of all heavy duty vehicle lifts. The valve housing built into the tank controls the flow of hydraulic fluid and protects the lift in case of overload.

Ideal for . . .

- Inspection Hoists
- Automatic Transmission Servicing
- Brake Adjustment & Replacement
- Body Repairs
- Wheel Changing or Rotating
- Drive or Transmission Unit Replacement & Servicing
- Wheel Alignment
- Engine, Gearbox Removal
- Front or Rear Suspension Removal
- Lubrication Service
- Predelivery Service
- Muffler & Exhaust System Replacement & Repairs
- Shock Absorber Replacement
- Rust Proofing

Safety Sensor Bar

The Molnar Quick Service Lift has been designed with enough workable height to accommodate vans and 4-wheel drive vehicles.

The Molnar Quick Service Lift features a safety sensor bar which prevents further lifting of the load as soon as the safety sensor bar has been touched.

Maximum protection

All Molnar Vehicle Lifts are protected to a maximum degree and amply meet the most stringent safety standards.

- automatic protection in case of cable breakage.
- automatic protection in case of hydraulic piping failure.
- automatic overload protection.
- automatic stopping in highest and lowest positions.
- dead man controls for lifting and lowering.

Service and installation

All vehicle lifts are supplied complete with service manuals and installation instructions.

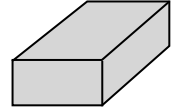

Extensive Service Facilities . . . Australia and World-wide.

QUICK SERVICE LIFT

OPTIONAL ACCESSORIES

FEATURING

QL - RB - rubber block for situations where clearance from vehicle componentry is required.

Most efficient hoist available

No wasted time

THE MOLNAR STORY FROM A HUMBLE BEGINNING IN 1951 TO AUSTRALIA'S LARGEST HYDRAULIC HOIST MANUFACTURER

Back in 1951, the new business trading as Steering and Wheel Alignment opened its doors to the public. Operating out of an old stone building in Pulteney Street, we specialised in Wheel Alignment, Wheel Balancing and Chassis Straightening. In a short time, the stone building was replaced with a new workshop and an additional 4 people had been employed after only three months of trading. Business increased even further and we outgrew the Pulteney Street Workshop.

In the early 1960's larger premises in Gilbert Street were acquired where early development on Australia's first Two Post Hoist began. Hoist sales increased rapidly and the Molnar Two Post Hydraulic Hoist was patented in 1972.

As the hoist business grew Molnar Engineering Pty. Ltd. again acquired larger premises - this time at Brompton. Today Molnar Engineering's major products are Hydraulic Two Post and Four Post Hoists, Platform Lifts, Car Parking Hoists and Scissor Lifts and relevant accessories. Molnar Engineering Pty. Ltd. products are exported to Asia, Europe, Africa, Middle East, Sub Continent and Pacific Regions.
