

"Molnar 4 Tonne 2 Post Premium is the best car hoist Molnar have ever produced"

Molnar 2P4T

Australian hoist manufacturer, Molnar Engineering has been manufacturing hoists for the Australian market for 40 years. They now proudly introduce the "Molnar 4 Tonne 2 Post Premium" into their vehicle hoist range. AWM recently caught up with Mr. Frank Molnar.

According to Mr. Frank Molnar, for a hoist to carry the Molnar name, it must be made in Australia, from Australian Steel while providing

Frank Molnar

customers a product that is superior in safety, quality, performance and longevity. A Molnar Hoist must exceed the Australian Standard and be manufactured to the highest quality which is why Molnar Engineering are able to export their hoist worldwide from their factory in Adelaide.

"When we set about to design this new 4 tonne Molnar hoist, we wanted to go beyond customer expectations. We knew we'd achieved that goal when Craig Drechsler (Repco's South Australian Equipment Manager) saw the hoist during testing lifting 6 tonne in just 35 seconds and called it "a Molnar hoist on Steroids!".

Unlike some, Molnar Engineering test their hoists until destruction to simulate up to 25 years of working life and place an emphasis on engineering more safety features into their hoists than anyone else, Frank added.

Features of the new 4 tonne 2 post hoist include:-

- A quality Australian product built to exceed the Australian Standard AS1418.9.

Extension Pick-up Pad EP02

- The fastest lifting hoist on the Australian market. "Time is money!"
- Large base footprint; designed to suit the thickness of Australian floors.
- Molnar Hoist servicing agents operate Australia wide providing reliable service and backup.
- Molnar Hoists are manufactured in Australia ensuring spare parts are always readily available.
- Large 13mm balance cables (500% safety margin) with cast steel pulleys.
- Overload protection for added safety.
- Powder coated finish, available in custom and corporate colours.
- Optional 240 volt model available.

Hoist being tested

- Large solid molded rubber pick-up pads (140mm dia.).
- Optional elevated pick-up extension pads. Easy to use "clip on - clip off" operation (Part no EPO2).

"Buying a Molnar Hoist is an investment in Australia's future. Buying a Molnar hoist means that you have selected an Australian made hoist with a bigger safety margin giving your workshop added peace of mind."
